PROFESSIONAL SUMMARY

A highly motivated and detail-oriented Front-End Developer with strong experience building visually appealing, scalable, and user-focused web applications using modern JavaScript frameworks and design systems. Demonstrates deep proficiency in React, Next.js, TypeScript, Tailwind CSS, Zustand, Axios, and React Query while maintaining a strong emphasis on clean architecture, component reusability, accessibility, and performance optimization.

Possesses hands-on experience developing enterprise-grade solutions within the agricultural technology ecosystem, contributing to mission-critical applications that streamline product traceability, logistics, warehousing, and operational workflows. Known for exceptional problem-solving skills, the ability to rapidly learn new technologies, and a passion for building meaningful digital experiences that improve efficiency and user satisfaction.

Combines technical expertise with strong communication, teamwork, and leadership abilities, including experience as a co-founder driving educational technology initiatives. Adept at collaborating across cross■functional teams, translating business requirements into intuitive front-end solutions, and delivering high-quality work in fast-paced environments.

EXPERIENCE

Front End Development Intern — Tilka Technologies
April 2024 – May 2025

• Contributed to the development of enterprise-level digital products used across the agricultural value chain, supporting agro organizations in improving efficiency, transparency, and operational workflows.
• Played a key role in building a **Traceability Application** designed to track agricultural products from farms to final export destinations. Implemented UI interfaces that captured structured transactions across farmers, traders, field agents, logistics partners, and export operators.
• Developed an **Inventory Management System** for a major cocoa company, enabling

real-time monitoring of logistics, warehouse activities, finance operations, and departmental coordination across large-scale supply networks.
• Contributed to the **Trace Admin Platform**, a centralized administration suite used to manage companies, clients, traceability workflows, and third-party service integrations.
• Collaborated with backend teams to integrate REST APIs using Axios while ensuring efficient caching, data synchronization, and request optimization via React Query.
• Utilized modern state management techniques including Zustand and Context API to handle global state, UI logic, and cross-application data flows.
• Followed responsive design principles and TailwindCSS best practices to create consistent, scalable, and accessible user interfaces.

Technologies: Next.js, React, TypeScript, TailwindCSS, Zustand, React Query, Axios, Context API, Git.

CO-FOUNDER — Nexstack
EdTech Startup

• Co-founded an educational technology initiative focused on equipping children and young adults with modern technological skills including programming, product thinking, and digital literacy.
• Contributed to the design of structured mentorship programs that help young learners navigate the evolving digital ecosystem and gain real-world industry exposure.
• Supported curriculum planning, training coordination, and digital resource development for learners at various skill levels.

EDUCATION

University of Lagos
B.Sc. Biochemistry — 2021

TECHNICAL SKILLS

HTML • CSS • JavaScript • React • Next.js • TailwindCSS • TypeScript • Zustand • React Query • Axios • Git • Modern Front-End Tools and Frameworks

PROJECTS

Traceability App — A digital platform that tracks agricultural products from origin to export, supporting transaction logging, verification, and multi-role workflows across the supply chain.

Agro Inventory Management System — End-to-end operations and logistics management for a cocoa company, covering warehouse tracking, financial workflows, and departmental coordination.

Trace Admin Platform — A centralized administration dashboard for managing companies, clients, traceability processes, and integrated services.
